

AMENDMENTS TO THE SPECIFICATION:

Please amend the specification as follows.

Please amend the paragraph spanning lines 9-12 of page 14 to read as follows:

Figure 1 shows the N-terminal sequences of 2C9 (SEQ ID NO:77) and 2C19 (SEQ ID NO:79), together with truncations (both SEQ ID NO:78) which remove the membrane-inserting N-terminal region. The numbering of residues given herein is by reference to the wild-type sequence.

Please amend the Table 1 on lines 11-16 of page 30, as follows:

Purification Stage	nmoles 2C[[1]]9	% recovery
Lysate	708	100
NiNTA Pool	534	75.4
CM Sepharose Flow Through	6.7	0.95
CM Sepharose Pool	566	80.0
